Revalidation Sticker Policy, Invoicing and Overdue Debts Policy   Page **2** of **17**

APPENDIX V.
CCDB Compliance

1. **Web Services**

   ER/PER must have implemented an approved web services tool for CCDB, i.e. one of the following:
   - "Card issuing" in ISIC HUB
   - ALIVE Platform
   - KYPL Platform
   - A local implementation using web services, as previously agreed with the ISIC Association´s IT & Operations team.

2. **Real-time**

   All issuance must be transmitted to CCDB in real-time
   - Real-time = average time lag between Creation and transmission to CCDB is $\leq$ 5 minutes.
   - The ISIC Association may approve exceptions to the above Real-time requirement in the case of co-brand partnerships (e.g. previously established legacy deals).

3. **Data Quality**

   All CCDB records must accurately contain (at least) the 6 essential attributes
   a. ISIC serial number
   b. Cardholder name
   c. Date of birth
   d. School name
   e. "Valid From" date
   f. "Valid To" date
   - *Minimum quality standard is that 98% of all CCDB records must contain all essential attributes.*
